

# Digital Technology and Design Codes Workshop

Insights from the PropTech Engagement Fund

## **Digital Planning Programme Outcomes**

#### Digital citizen engagement

 enabling everyone to easily engage with the planning system

#### Modern planning software

 more efficient software for the planning system, underpinned by data not documents

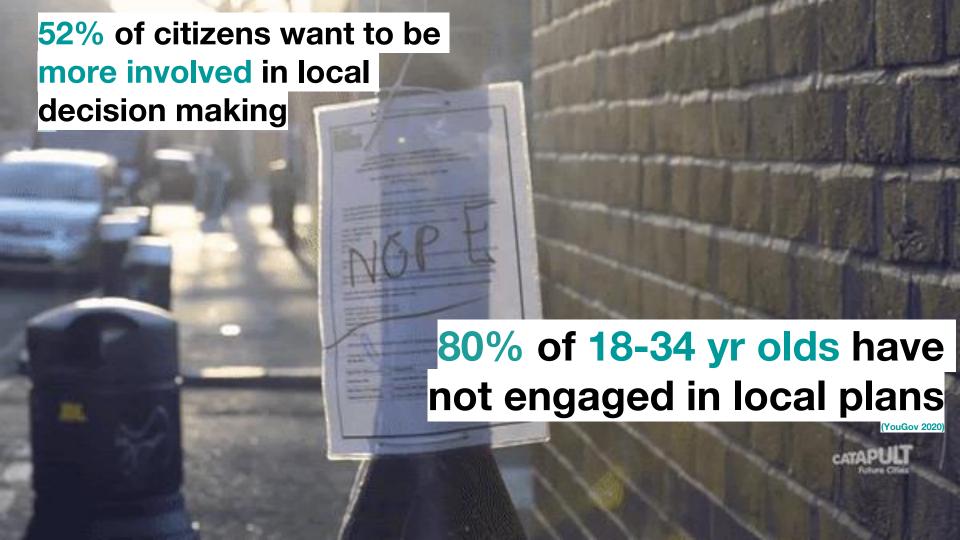

Data and Standards delivering the data
infrastructure required for a
data-driven system

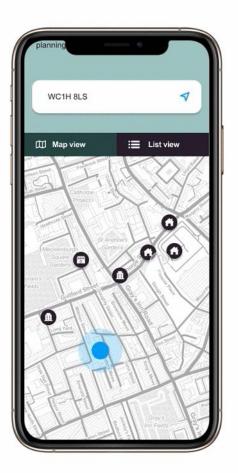

Digitising the plan making process - map-based local plans based on machine readable data and rules

# The future: Digital Citizen Engagement

Scale the use of new digital engagement tools that allow citizens to give their views on shaping their local area and understand the trade offs and opportunities of development.

#### **Accelerating adoption across industry**

Harborough District Council

ORNWALL

COUNCIL me and all • oven haa oll

**41 Projects** 

47 LPAS

£5.2M in funding

Reg 18, Reg 19

**Planning Publicity** 

Masterplanning, Estate Regeneration, Council Led **Development, Community Development, Infrastructure** 

## Proven outcomes at scale and pace

A new voice emerging... increased quantity & diversity of responses

A more positive dialogue and support for planning

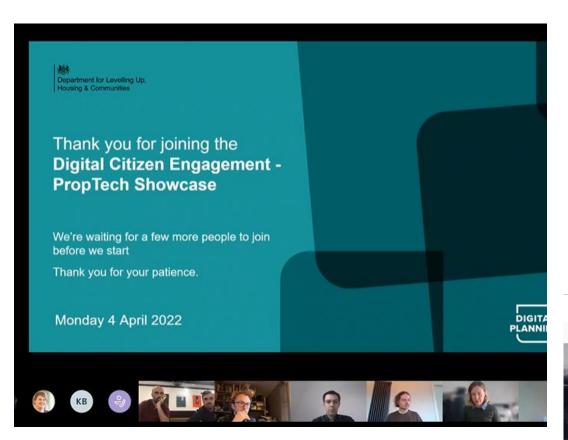

Crowdsourcing community ideas, innovation and advocacy

Reducing administrative costs and burdens

Increased LPA capacity and capability

### Supporting a fast growing PropTech ecosystem

## Key takeaways

- Traditional engagement methods alone cannot fully streamline the planning policy and development process as they are fragmented, time consuming and often attract a vocal, adversarial minority.
- Digital citizen engagement/PropTech tools have the potential to improve planning conversations and processes for all parties by:
  - increasing the quantity and diversity of people who engage
  - saving officer resource and money
  - enabling a more positive conversation about planning, design and development.
- Industry allies are critical in this process, to ensure digital solutions and outcomes are co-designed and work for all stakeholders
