

# PAS conference - Planning for a better environment workshop session

1. Introduction – maps and new tools
2. Workshop discussion – how could this all come together?
3. Bolsover DC – Chris McKinney & Chris Fridlington with an overview of what they've been doing in this space

## Environment Act

## LURB

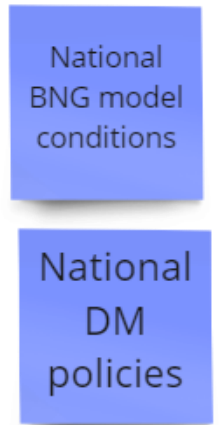

## Habitats Regs

## Other stuff

## NPPF

## PAS conference - Planning for a better environment workshop session

- a. Does the emerging legal and policy context mean you would do your Local Plan differently and if so, how? Do you have all the tools you need?
- b. Can Local Plans move from 'constraints' limiting development to 'opportunities' and investing in the environment for nature and people?
- c. The area circled on the map has been identified as important for flood risk mitigation, carbon storage, wetland habitat creation and public greenspace. What are the implications for plan making?
