**Project ECHO: Enhanced Compliance for Health
Outcomes | International Travel Quarantining at Home**
Steve Whatson, Deputy Programme Director

The journey of a traveller from an amber list country

Pre travel: Traveller completes PLF and books tests

The passenger locator form indicates the intention to travel to UK. Traveller will take a PCR test prior to arrival and book additional tests for days 2 and 8 of quarantine

Day 0: Passenger returns to UK

Once returned to the UK quarantine begins for 10 days, at the address on the PLF

Day 2: Traveller completes PCR test

The traveller will continue to quarantine, if the result is positive the 10 days extends from test date

Day 5: Optional test to release

The traveller will take a test on day 5 of quarantine, and can be released early if a negative result is received

Day 8: Traveller completes PCR test

The traveller will continue to quarantine, if the result is positive the 10 days extends from test date

Day 10: Quarantine ends

After 10 days the traveller will have completed quarantine if all test results have returned negative

The data is received from DHSC and processed by the run team

Mitie are conducting visits using an app and set workflow

Hi, my job is to ensure people are self-isolating where they have a legal requirement, and to answer any questions you may have.

The legal duty to quarantine is in place based on scientific advice that says it helps reduce infections in the UK and saves lives and protected communities. It also helps stop the spread of new variants of the coronavirus which might make our current vaccination efforts less effective.

Summary of the service since 8th April

The **service went live on 8th April**, and has **rapidly scaled up** and has **more than tripled the system capacity** for visiting arrivals.

Staff have been carrying out **checks on those quarantining at home** following international travel **since 9th April**. More than **530,000 visits have been carried out** to date which is **c.6,500 per day** across the service.

Following a visit, the **outcomes are 61% compliant** to date, however over the past two weeks the **average has increased to 68%**. For non-compliant visits there have been **c.30 police referrals per day** which is **less than 0.5% of all visits**.

Mitie are able to conduct visits **all over England**, as shown in the image. The majority, around **41%**, have taken place in **London**.
