

Brexit: LGA call for information

We are renewing our call for information on impacts of Brexit in order to shape the second phase of negotiations and create a pro-active, forward facing view of local government after Brexit.

As leaders of your place we want to hear about what's important to you. The questions and issues below are therefore suggestions for topics you may wish to cover, rather than strict requirements.

Please submit your response at www.local.gov.uk/brexit-call-for-info

Questions? Please email brexit@local.gov.uk

Economy: what are the risks and opportunities of Brexit on your local economy and what impacts do you expect in the future?

Your response could include:

- Any economic modelling of potential effects conducted by your authority or your local businesses.
- The general response from your LEPs and local businesses.
- The challenges and opportunities for future programmes to support local firms importing and exporting.
- Any local investment opportunities or risks arising from Brexit.

Workforce: what risks and opportunities does Brexit represent for your local workforce and the skills of your residents?

Your response could include:

- Any modelling of your local labour market, including analyses of those sectors and services likely to experience the greatest change.
- Risks and opportunities of EU exit on delivery of the services you provide.

Funding: what are your priorities for local growth funding, particularly for the UK Shared Prosperity Fund (UKSPF) domestic successor regime, and which other sources of funding are particularly important to your local economy?

Your response could include:

- Your headline priorities for the UKSPF.
- Examples of successful projects, what they achieved and how they could be better supported.
- Your opinion on the role of local authorities in allocating and awarding funds as well as maintaining transparency and flexibility in growth programmes.

EU legislation: what are your priorities for local government when EU legislation is reviewed in the UK?

Your response could include:

- Any existing regulatory frameworks, that you would change and those that you would keep.
- Which regulatory functions currently delivered by EU agencies you think would sit better with local government than national government.
