

The background of the slide is a photograph of a rolling green landscape with several wind turbines in the distance under a cloudy sky. A large, bright green geometric shape, consisting of a triangle and a circle, is overlaid on the right side of the image.

OVO Energy

How ECO4 can help Local Authorities help their residents in fuel poverty

ECO4: LA Flex potential through OVO Energy

- Over 25+ ECO4 Partners contracted across Great Britain to deliver our obligation- Up to 50% of the contract could be LA Flex Annual Bill Savings
- More than 5000 households are likely to receive full retrofit funded by OVO in 2023
- Data sharing agreements with local contracted ECO partners is the easiest way to obtain OVO ECO Funding-
 - ECO partner manage whole ECO4 project
 - ECO partner manages relationship with OVO Energy

Other ways OVO Energy could help Local Authorities

- OVO ECO team is available to give help in terms of understanding the complex ECO4 requirements,
- OVO has provided ECO funding direct to LA through ECO3, and are happy to discuss whether this could be a route for ECO4
- OVO Energy often looking for new partners- if Local Authority has a framework of retrofit installers, there is the potential OVO Energy (following due diligence) could add them to our ECO4 Preferred Partner list and provide ECO4 funding,

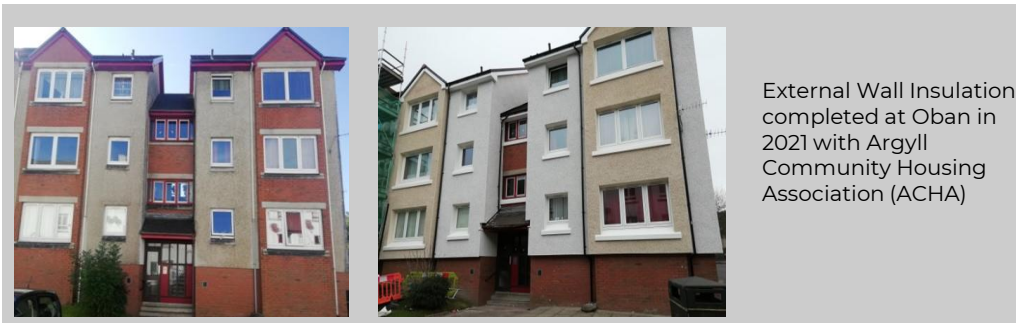

OVO Energy Solutions

OVO Energy Solutions operates on a B2B2C basis, partnering with **Local Authorities** and **Housing Associations** to help them achieve their fuel poverty and energy efficiency objectives for homes, at their optimum capital cost.

The homes which we improve are **low income** and **vulnerable households** in both private and social housing. We blend funding from different sources, and we *currently* provide the work **free of charge to residents**.

A typical project is an 'area based scheme' of **150 - 200 homes**, either in a community or across a wider geographical area, depending on the objectives of the project and the funding purpose.

Practical support from OVO Energy

Contact us at eco@ovo.com, we're happy to help you move forward in ECO4
