BetterEvidence  
for BetterPolicing™

# The evidence base for tackling knife crime

Abigail McNeill – Senior Research Officer  
6<sup>th</sup> February 2020

## The College's role

**The independent professional body supporting everyone working in policing to reduce crime and keep people safe.**

## Research evidence - summary

Tailored  
approaches  
to specific  
problems

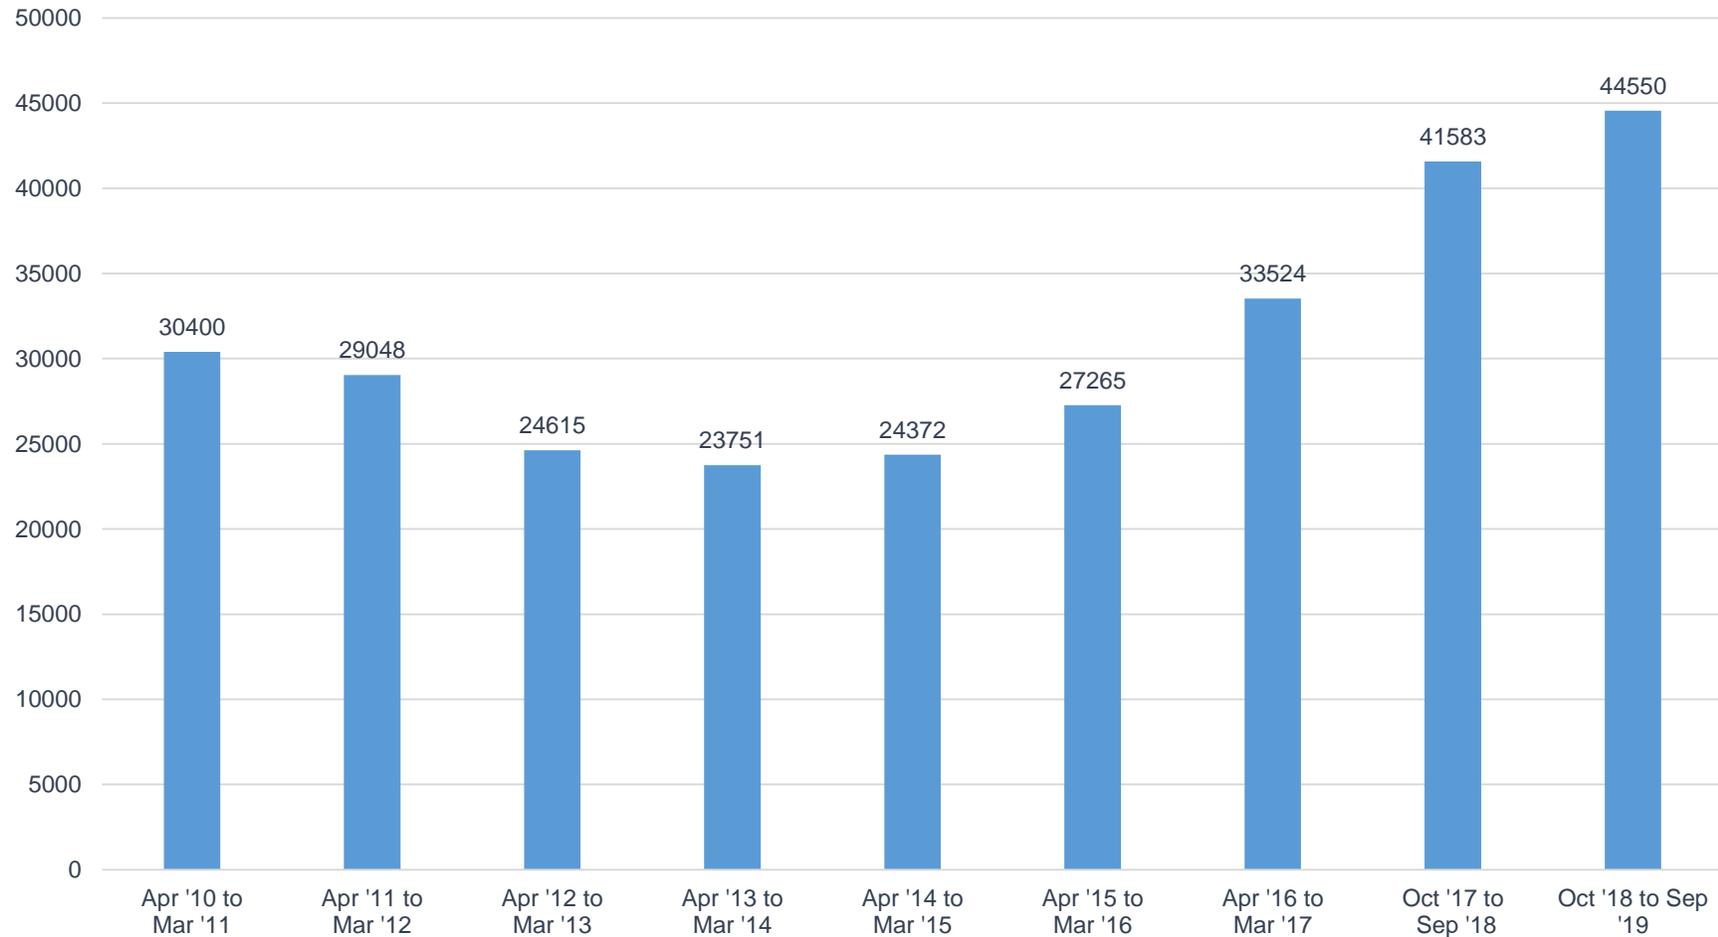

Focussed  
deterrence  
and early  
intervention

Multi-  
agency and  
multi-  
faceted  
solutions

# What is knife crime?

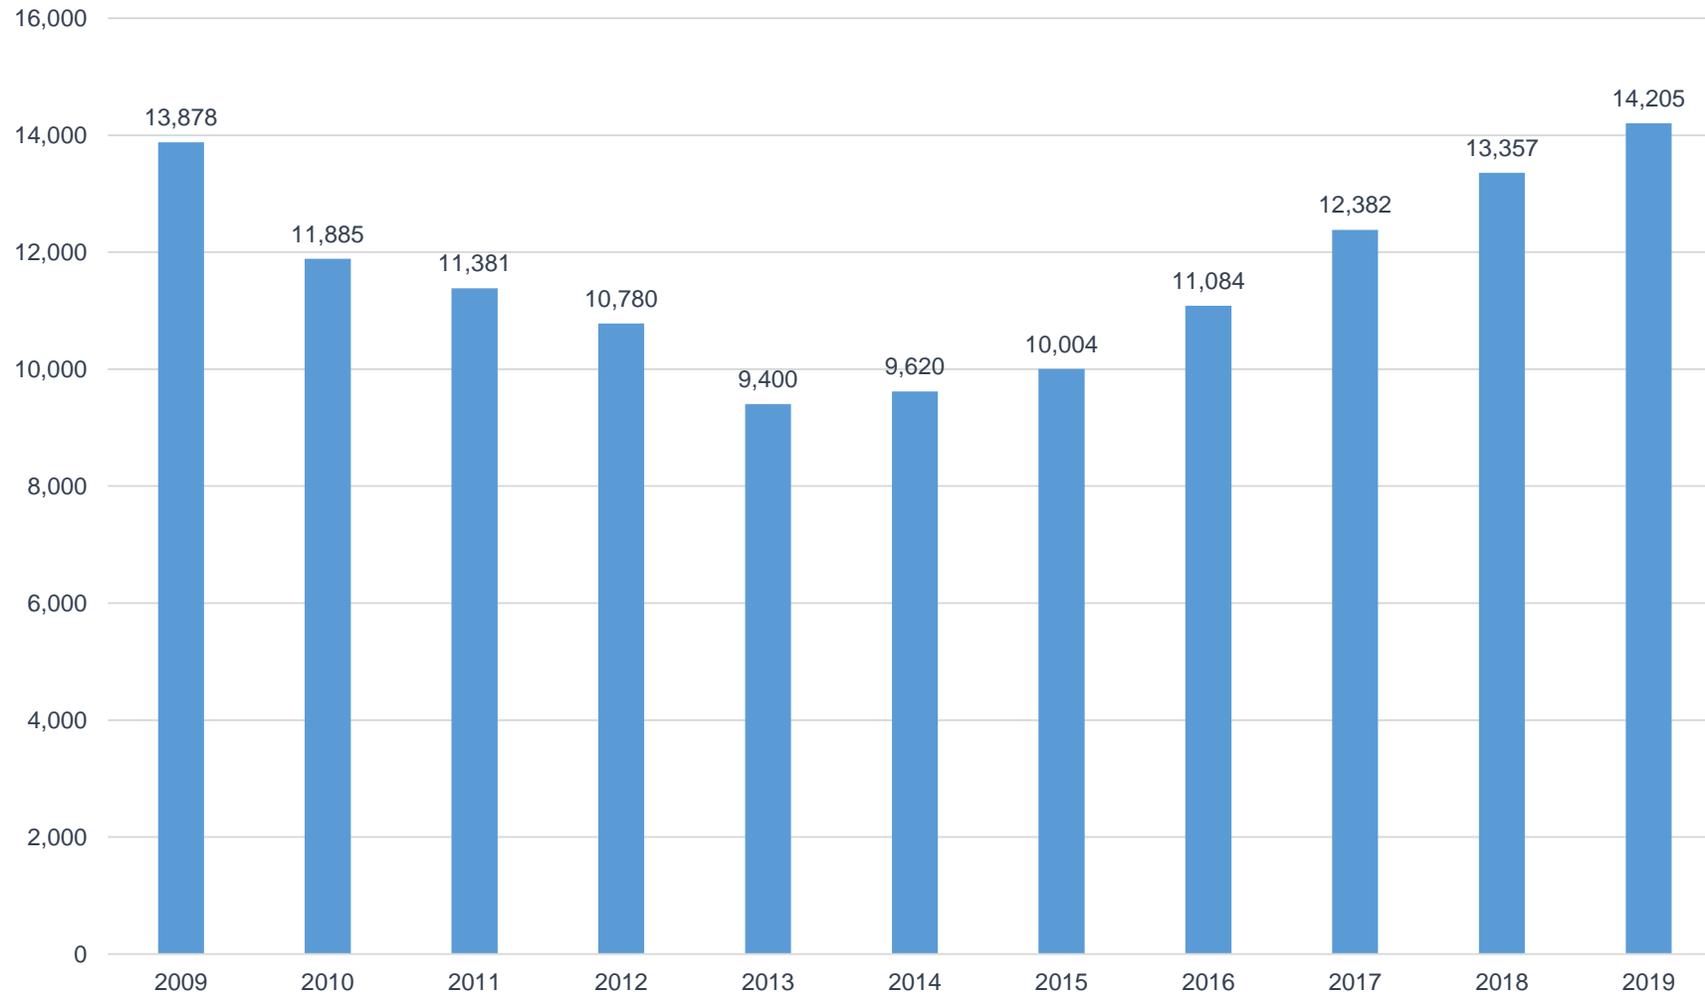

- ‘Knife crime’ is defined as any offence that satisfies both of the following criteria:
  - homicide, attempted murder, assault with intent to cause harm, assault with injury, threats to kill, sexual offences (including rape) and robbery;
  - Where a knife or sharp instrument has been used to injure, used as a threat, or the victim was convinced a knife was present during the offence.
- ‘Knife Carrying’ / Possession
  - It is classed as a possession offence for a person to have with them in any public place or school premises any offensive weapon without “lawful authority or reasonable excuse”.
  - An "offensive weapon" is defined as “any article made or adapted for use for causing injury to the person”.

## Total violent and sexual offences involving a knife or sharp instrument recorded by the police

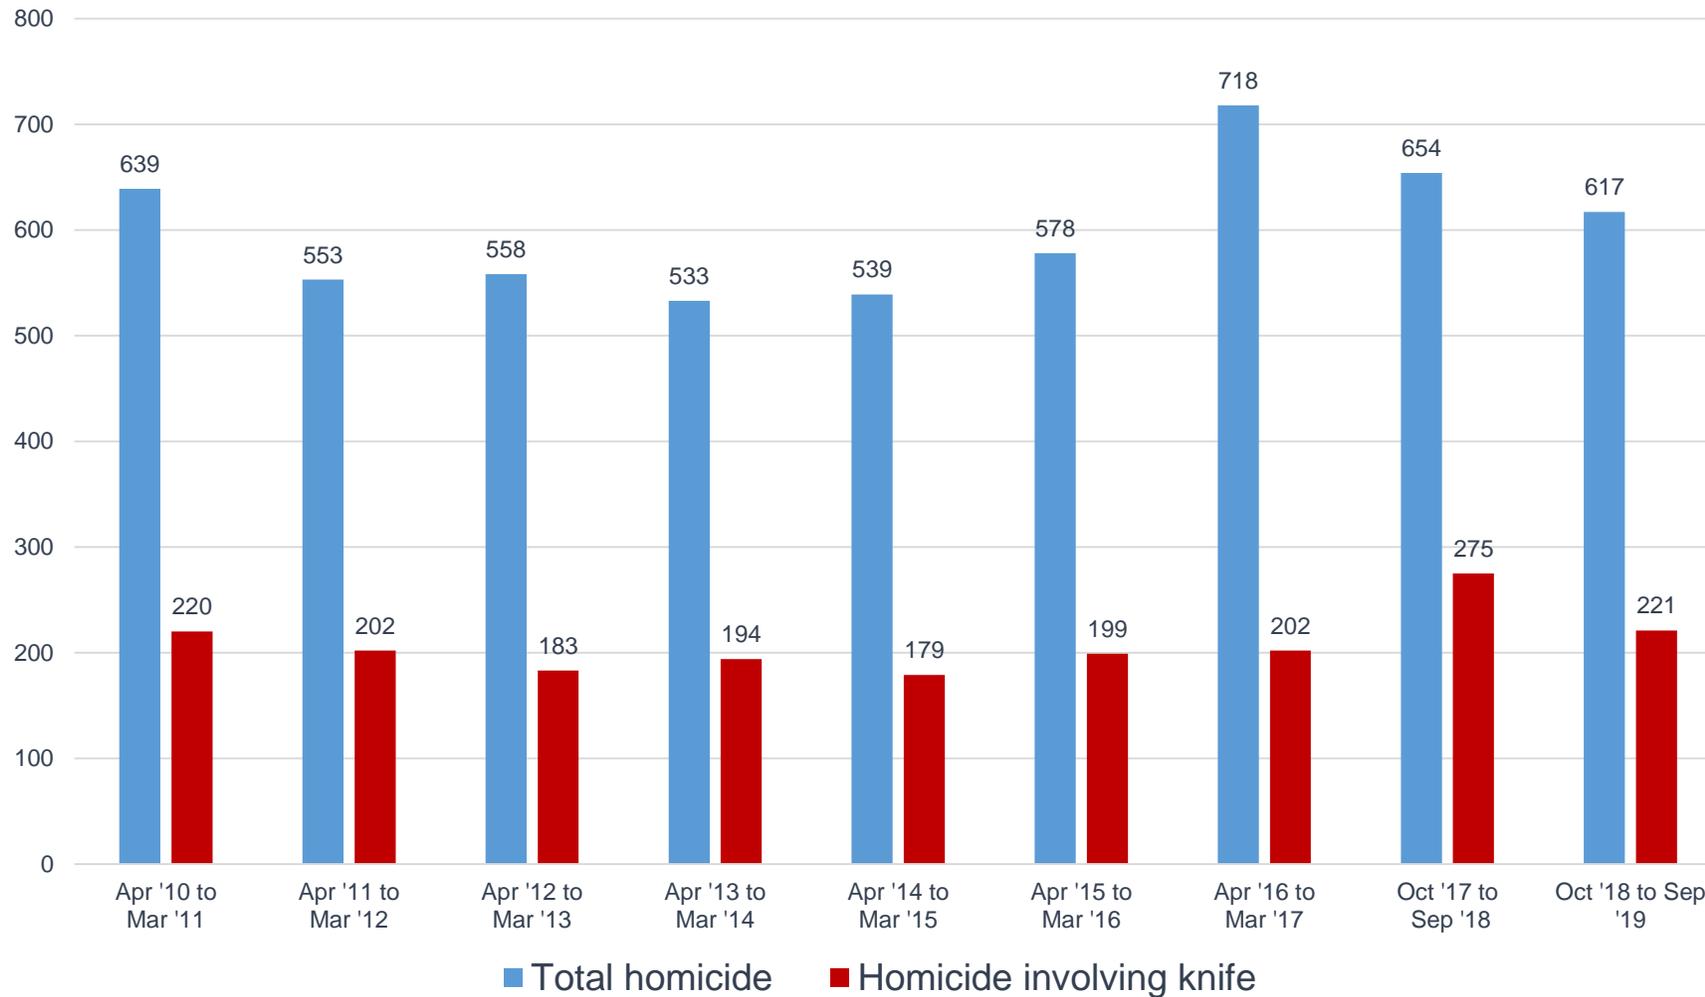

Source: Home Office - Police recorded crime. England and Wales (excluding Greater Manchester Police)

## Total possession of an article with a blade or point offences

Source: Ministry of Justice, Knife and Offensive Weapon Sentencing Quarterly, England and Wales. Year ending June.

## Total homicides and those involving a knife

Source: Home Office - Police recorded crime. England and Wales (excluding Greater Manchester Police)

# Motivations

for weapon carrying have broadly been categorized in three ways...

- **Self protection and fear** are particularly significant motivations for individuals who have prior experience of victimisation, and may be characterised as 'defensive' weapon-carrying;
- **Self-presentation** is perceived to play an important role for individuals who seek to conjure notions of 'street credibility' and 'respect' where they perceive a lack of access to status symbols;
- **Utility** motivates those who use weapons to facilitate other behaviours, we may characterize this as 'offensive' weapon-carrying.

# Risk factors

There is some evidence that the following **risk factors** may be associated with increased risk of violence and/or weapon carrying...

- **Gender** - males are more likely to commit serious violence and carry weapons
- **Age** - self-reported weapon carrying peaks around the age of fifteen
- **Adverse childhood experiences** – including abuse, neglect, parental criminality and/or substance abuse, being taken into care
- **Educational attainment** – school exclusion and low attainment
- **Ethnicity** – recent analysis of data collected in the UK indicates that there is no statistically significant relationship between ethnicity and weapon carrying

# Interventions with the greatest potential

## Focussed deterrence

A comprehensive problem solving approach - '**Pulling levers**'

- targets **prolific or repeat offenders**, combining improved access to support with strict enforcement (sometimes called a 'carrot and stick' approach).

Successful implementation of these types of approaches involves:

- **multi-agency working** involving a range of partners including law enforcement, social services and community-based practitioners;
- **analytical work** to identify key offenders, groups, and behaviour patterns;
- developing a response to offenders that uses a **variety of interventions**, both access to services and support, and criminal justice processes - 'pulling levers'
- **directly and repeatedly communicating with offenders** to make them understand why they are receiving this special attention.

# Interventions with the greatest potential

## Early intervention and prevention programmes

A range of programmes show positive effects.

- Target **'at risk' young people** to change norms and values towards violence at a young age

Early intervention programmes that have shown promising effects include:

- **child skills training** – teaching social and emotional skills, problem solving and anger management
- **behavioural parent training** – supporting parents to reinforce good behaviour
- **mentoring** – with an emphasis on emotional support and role modelling
- **after school recreational activities** – teaching skills in a structured and supervised environment.

Intervention ▲▼	Impact on crime ▲▼ Effect	How it works ▲▼ Mechanism	Where it works ▲▼ Moderator	How to do it ▲▼ Implementation	What it costs ▲▼ Economic cost	
Aggression Replacement Training (ART) for reducing antisocial behaviour	X✓ 	 	 	 	 	
Cognitive Behavioural Therapy (CBT) for Domestic Violence	✓ 	 	 	 	 	
Domestic abuse sanctions	X✓ 	 	 	 	 	
Limiting alcohol sales	X✓ 	 	 	 	 	
Relationship violence education	✓ 	 	 	 	 	
Second response to domestic abuse	✓ 	 	 	 	 	
Youth curfews	X✓ 	 	 	 	 	

# Evidence gaps

## **Multi-agency approaches**

- Testing of focussed deterrence in a UK/ E&W context
- Testing the impact of “public health” interventions on serious violence in the UK/ E&W

## **Building on limited existing evidence**

- Stop and search in violence hot spots
- Knife bins and knife amnesties
- Local community and educational interventions
- Publication of knife crime images

## **Generating evidence in new areas**

Overall lack of evidence in relation to different tactical approaches, e.g.

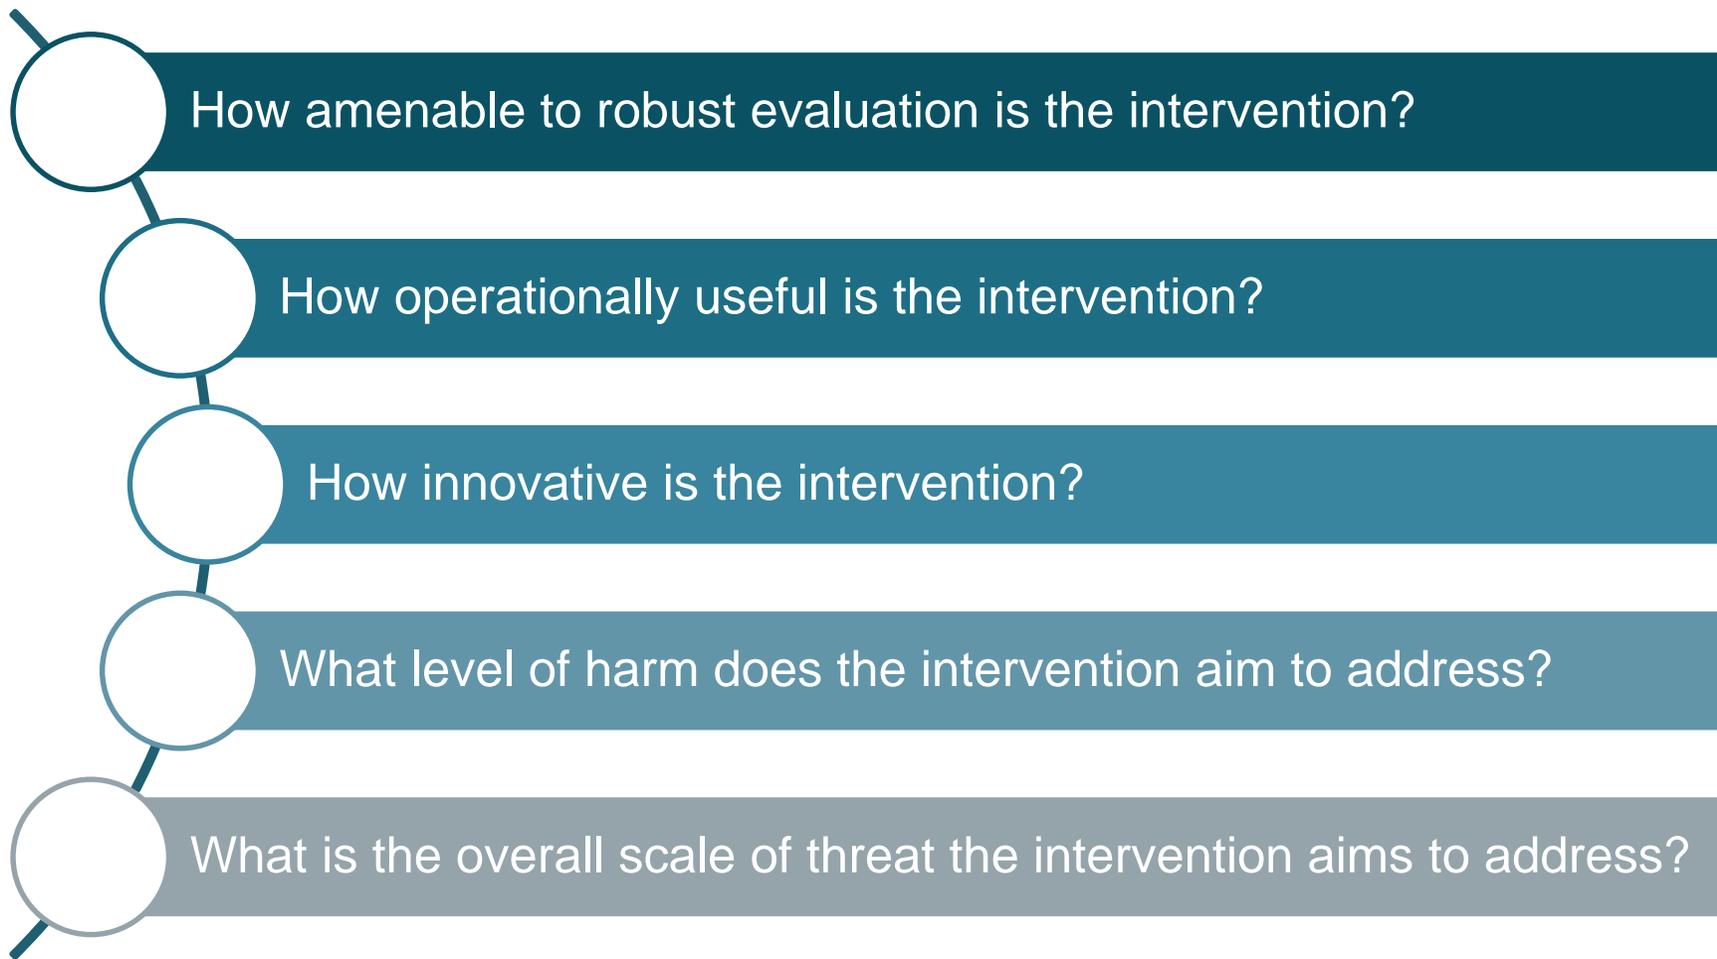

- Weapons sweeps
- Age restrictions on knife purchases
- Targeting Habitual Knife Carriers

# Vulnerability and violent crime programme

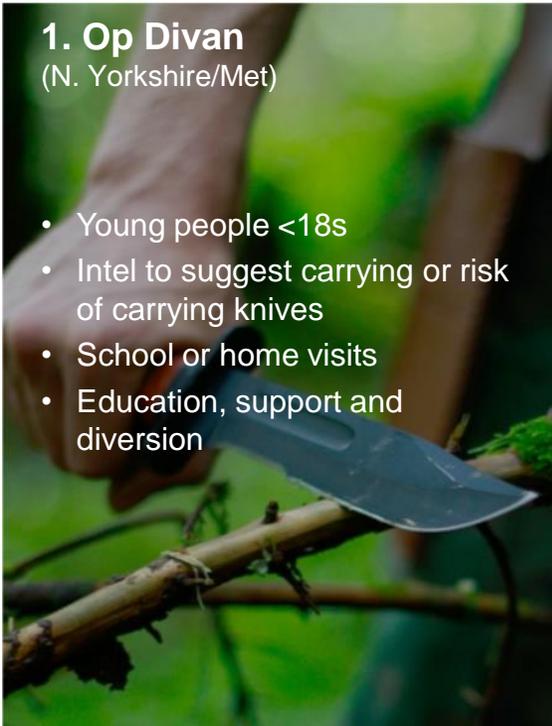

## Objectives

- **Creation of new evidence** to support policing to tackle high priority areas such as protecting vulnerable people, or to support a strategic shift to the prevention of both crime and non-crime related demand.
- The **implementation of initiatives that ‘work’** at the local and National level **is accelerated**, particularly in the area of vulnerability.
- **Use of evidence based approaches** in professional practice **are embedded** within policing culture.

## Call for practice

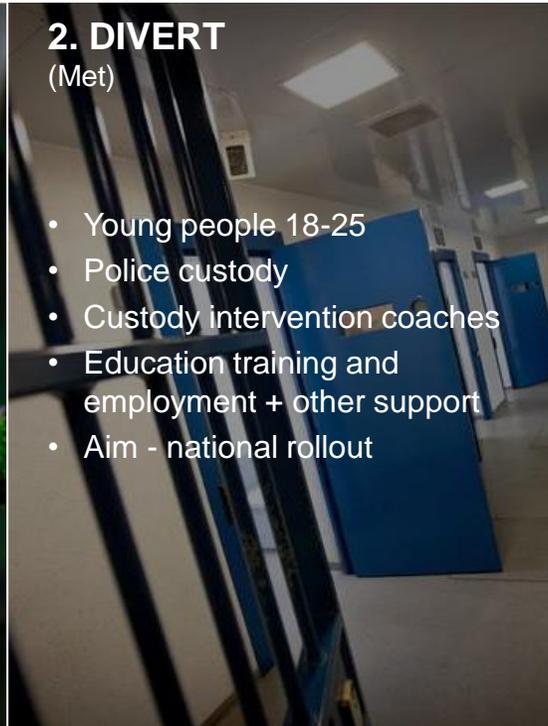

- 
- How amenable to robust evaluation is the intervention?
  - How operationally useful is the intervention?
  - How innovative is the intervention?
  - What level of harm does the intervention aim to address?
  - What is the overall scale of threat the intervention aims to address?

# Gangs and Youth Violence

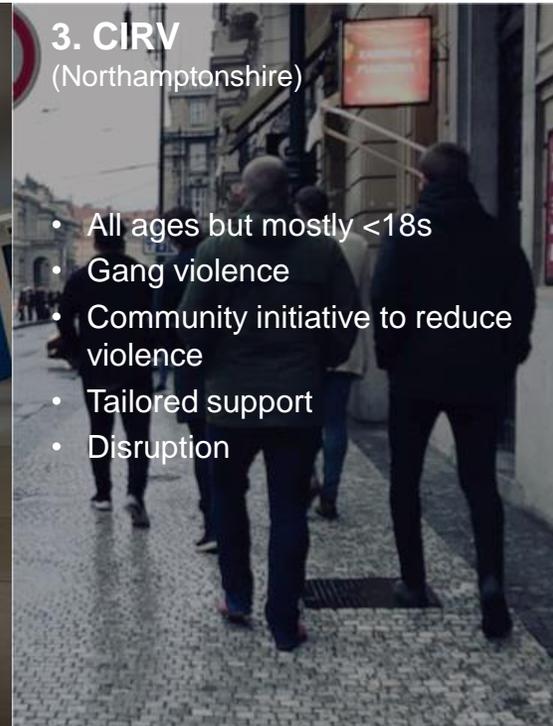

**1. Op Divan**  
(N. Yorkshire/Met)

- Young people <18s
- Intel to suggest carrying or risk of carrying knives
- School or home visits
- Education, support and diversion

**2. DIVERT**  
(Met)

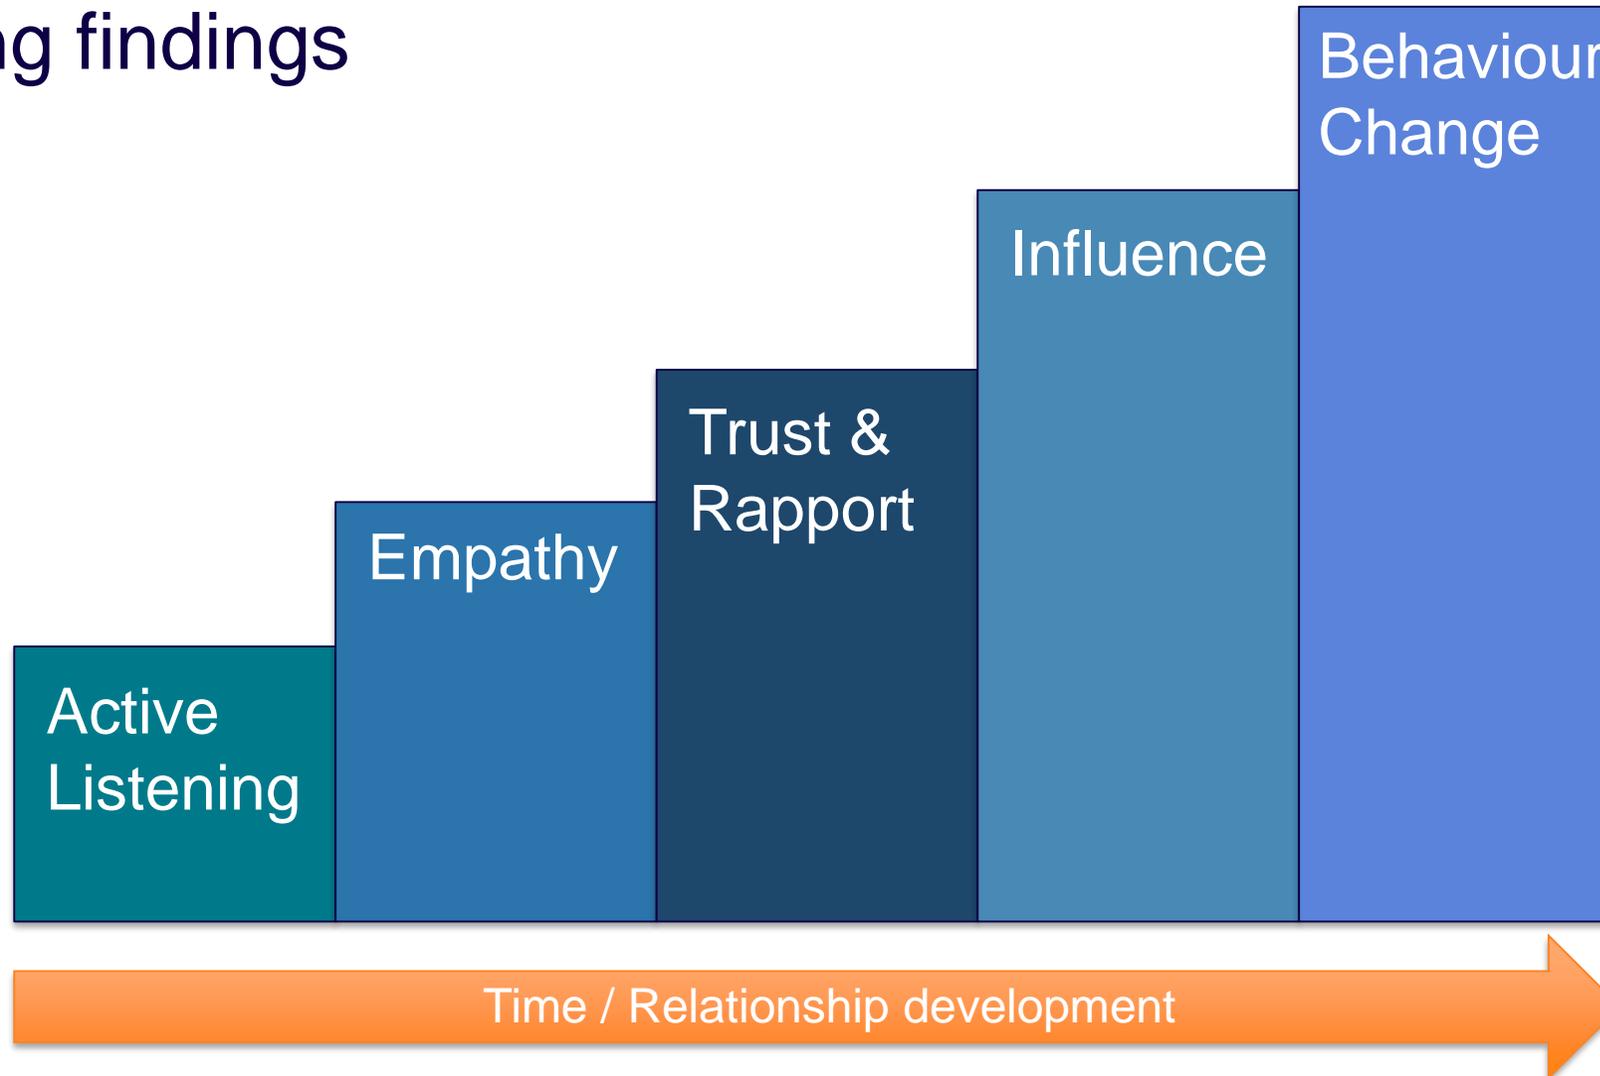

- Young people 18-25
- Police custody
- Custody intervention coaches
- Education training and employment + other support
- Aim - national rollout

**3. CIRV**  
(Northamptonshire)

- All ages but mostly <18s
- Gang violence
- Community initiative to reduce violence
- Tailored support
- Disruption

# Emerging findings
