The green bus revolution

UK has the **cleanest** ever bus fleet

operators have invested **£2 billion** over past 5 years **cleaner greener buses**

The infographic features a grey map of the United Kingdom on the left, with several green leaves scattered across it. Below the map, two modern buses are shown: a smaller green and black bus in the foreground and a larger black and green bus behind it. The right side of the infographic is a dark grey vertical bar with a large green arrow pointing upwards. Inside the arrow, the text 'operators have invested £2 billion over past 5 years cleaner greener buses' is displayed in white and green.

The future for bus

VISION FOR 2030

give 16 million more people easy price-capped tickets

cut carbon dioxide by half a million tonnes per year

cut congestion for quicker journeys

help 1 million people look for work & 800,000 apprentices develop skills

identify practical, affordable & sustainable rural transport
