

Joining the dots

Are parenting programmes the key to integrated local family support?

Associate Professor Matt Buttery

Chief Executive Officer

matt.buttery@triplep.uk.net

Backed by research, proven by parents

Overview

- Scale of the challenge
- Rationale for parenting as a golden thread
- Parenting support service configuration
- Towards an integrated and population health led approach

Safeguarding Pressures: Change in children's services activity

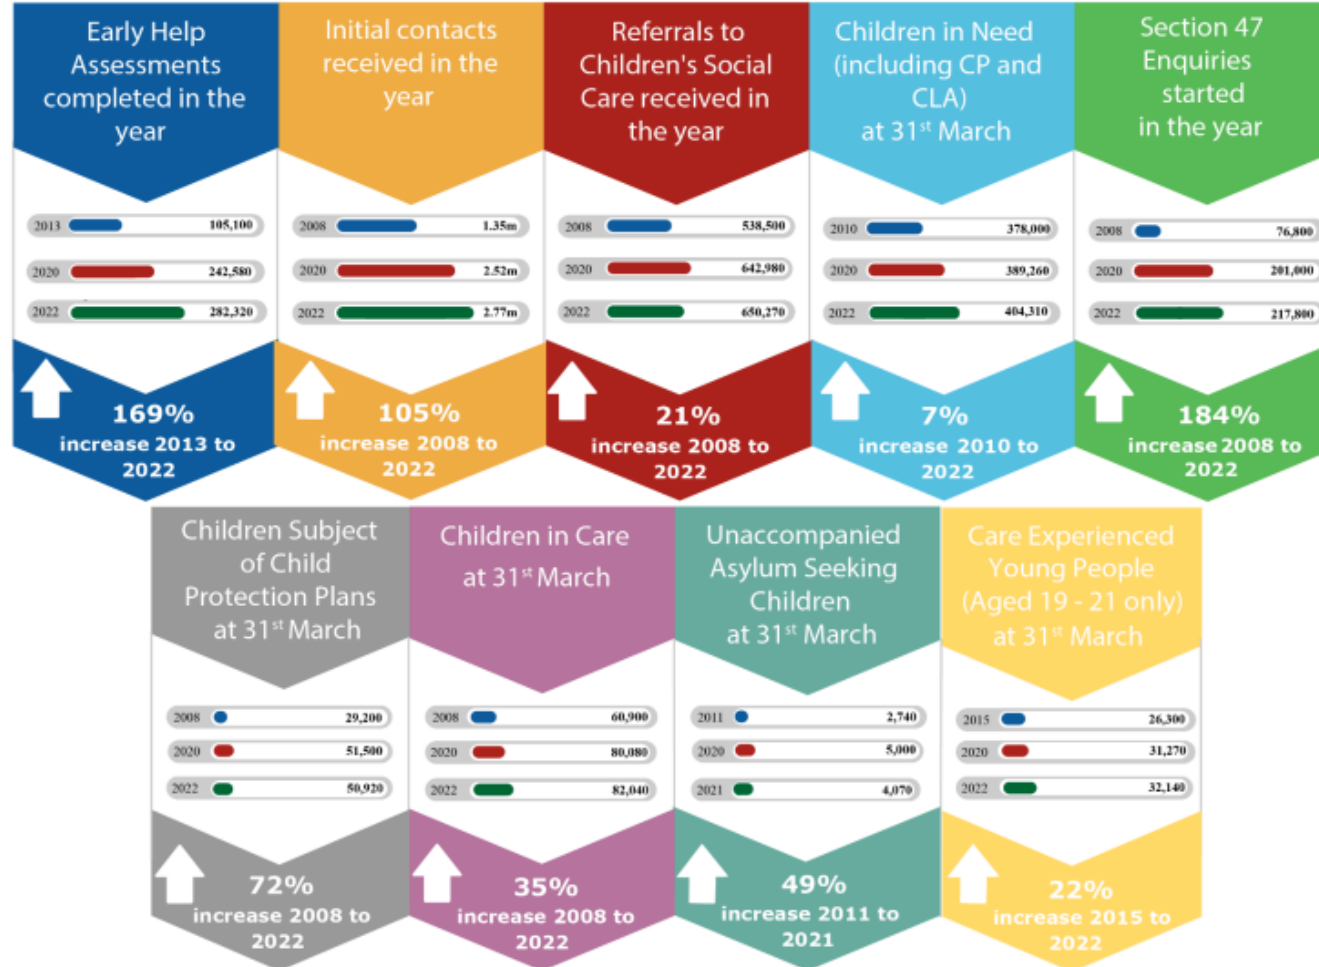

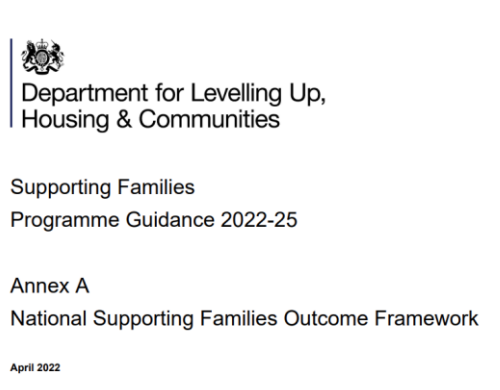

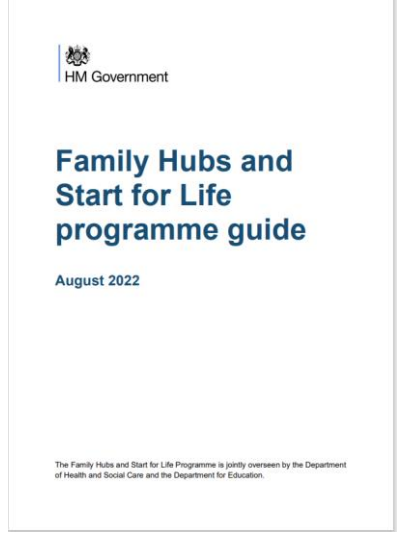

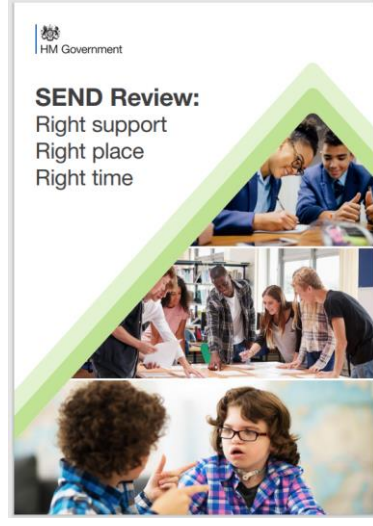

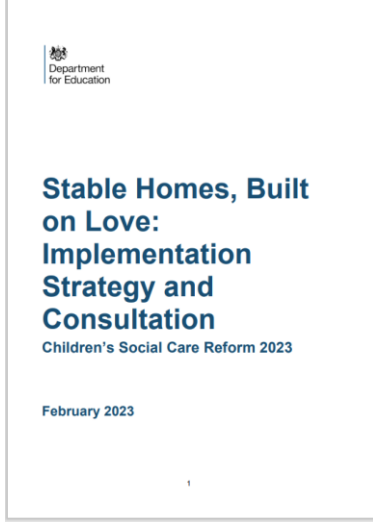

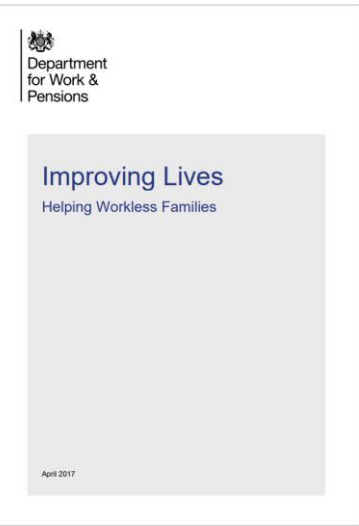

Figure 13: Where nationally available data is not available, results from responding authorities has been extrapolated to an all-England total based on proportion of population covered. Source of latest data for Early help assessments, Initial contacts, Children in Care, UASC and Care Experienced Young People: SGP8 respondents.

Context: Wide number of policy's often addressing discrete elements; fiscal / human capital challenges

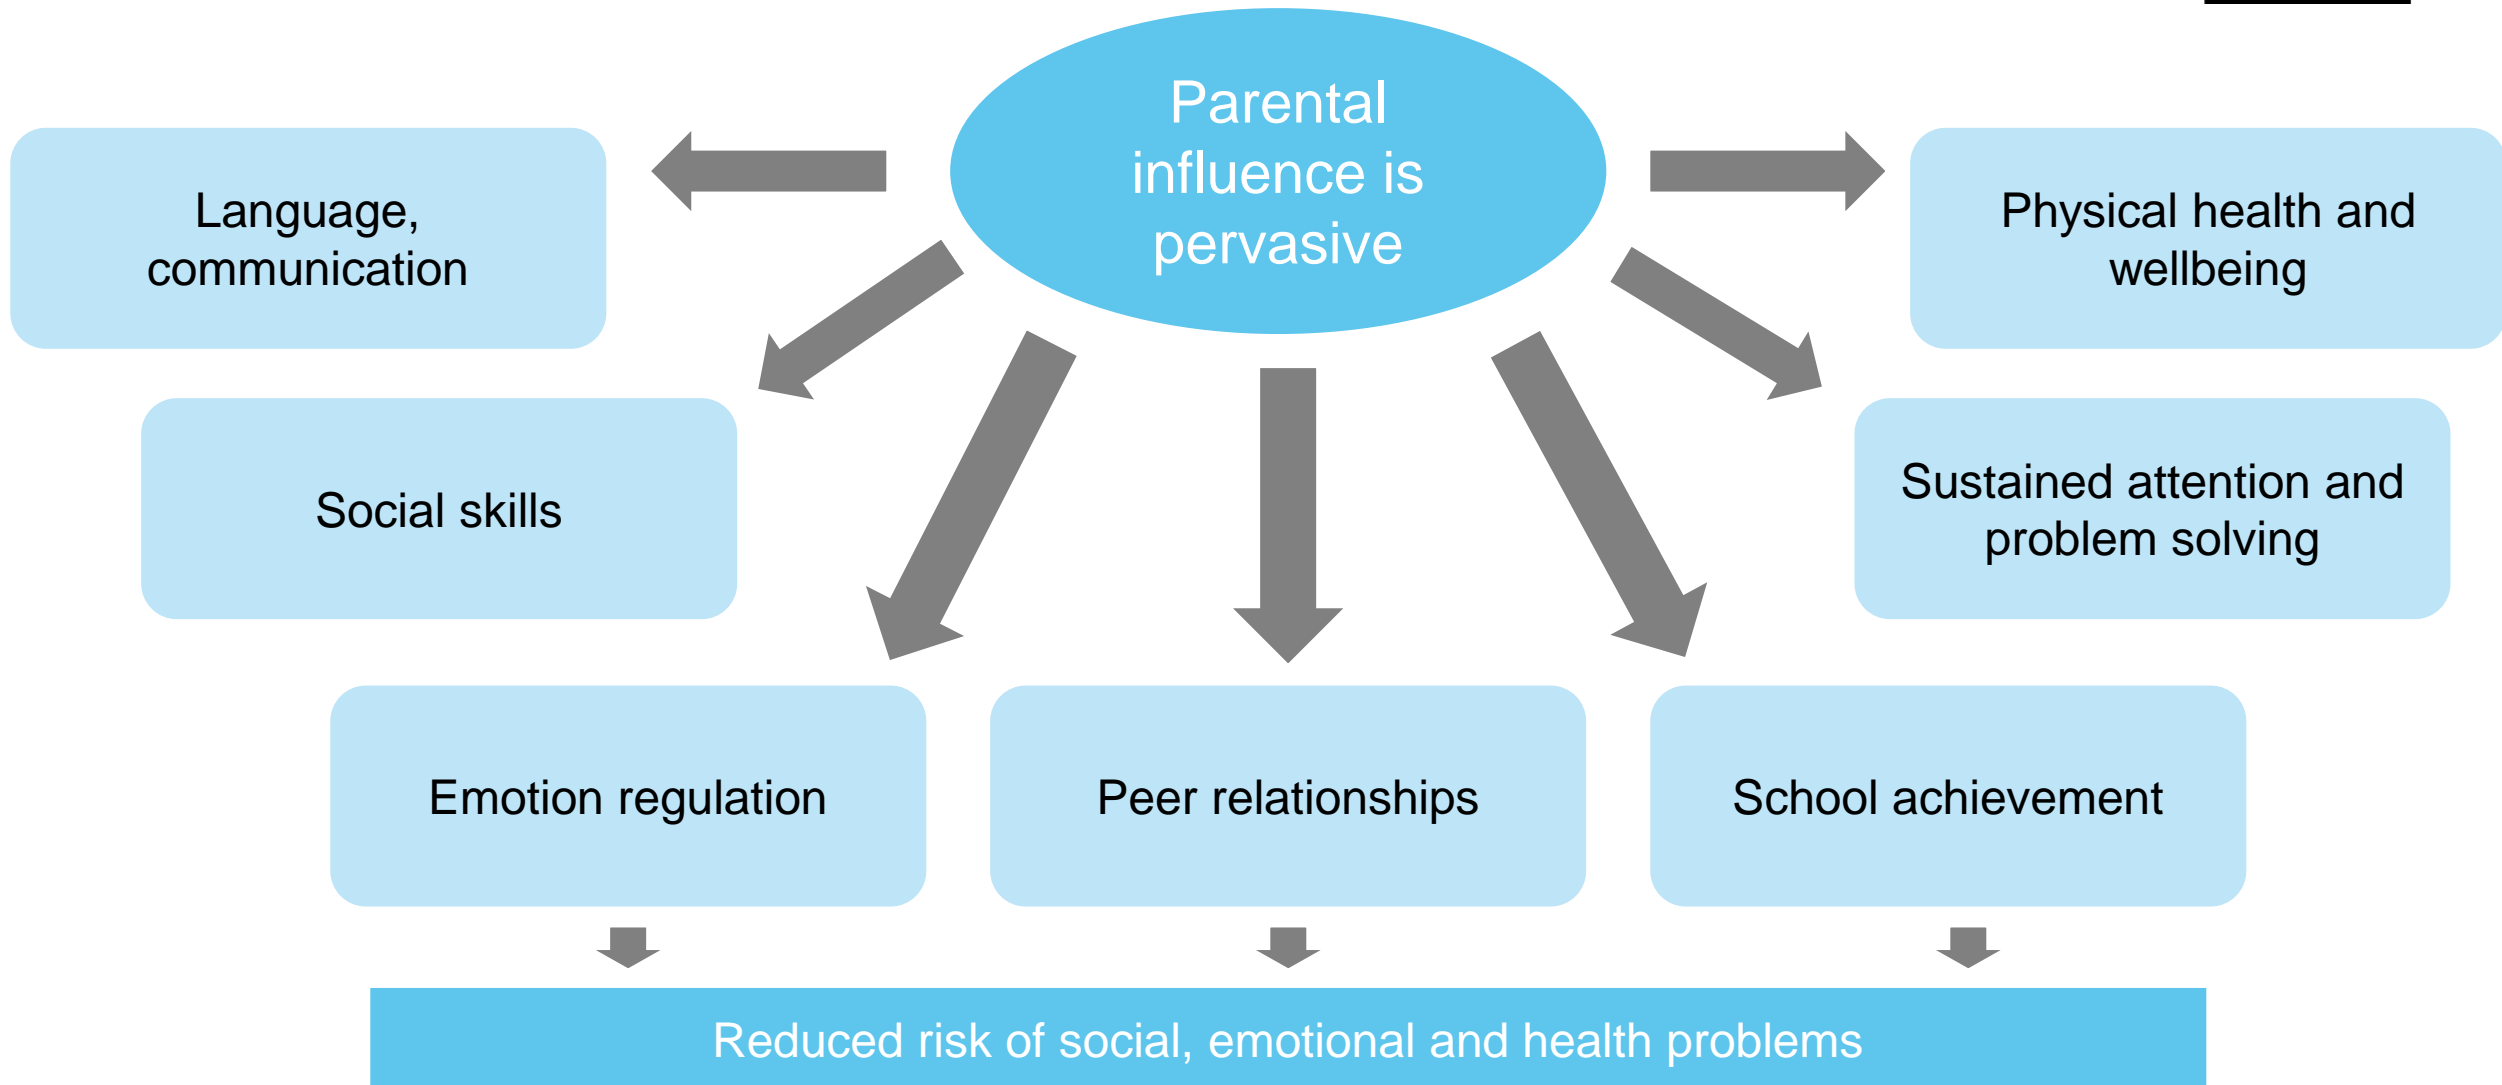

Challenge: how can we use available resources and impetus to ensure a cohesive and joined up system of support that works for children and families

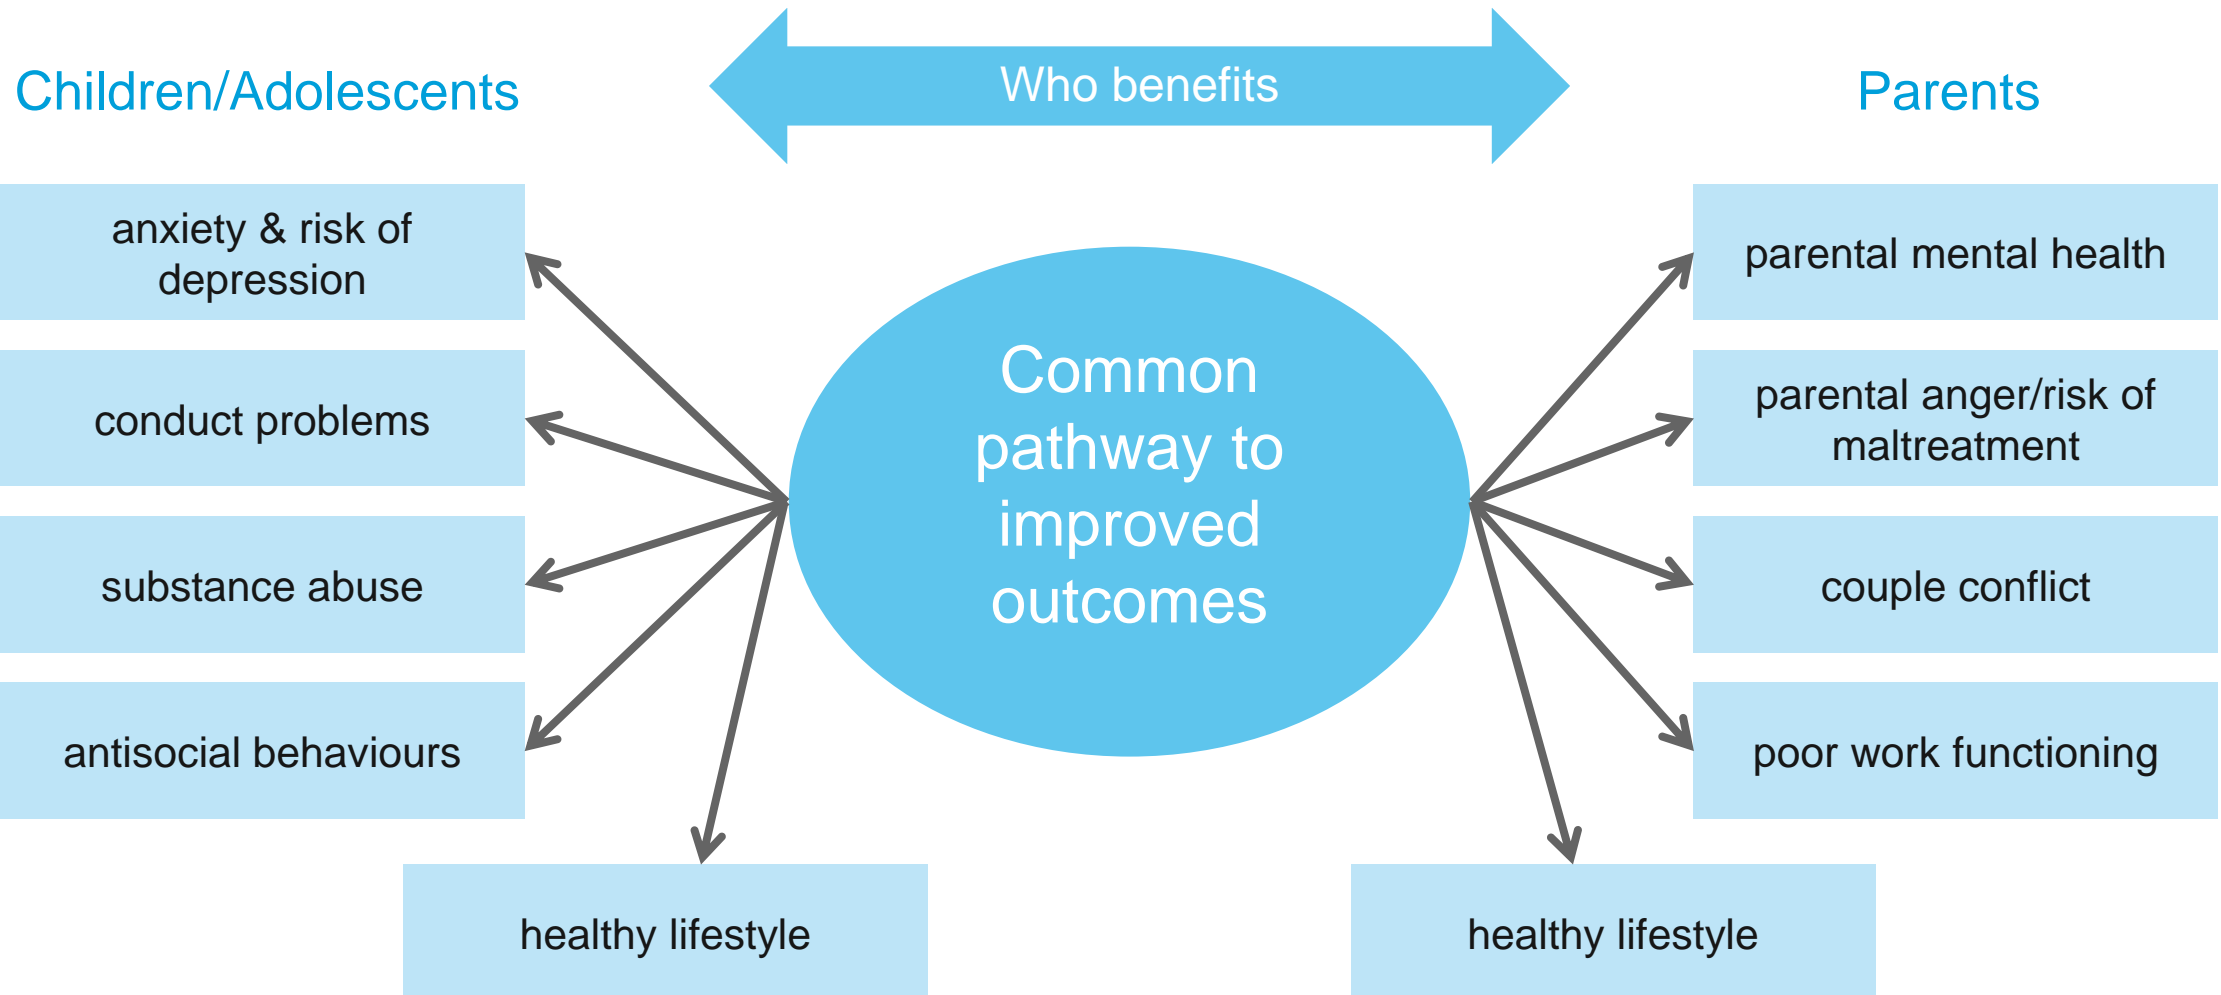

Parenting as a golden thread for service design & delivery

Why is parenting important?

Evidence-based parenting programs concurrently address multiple problems

Models of Triple P deployment (inc: pros / cons)

Single Service Area

Early Help
Delivery of Family
Transitions for
RPC

Inclusion Team
Delivery of
Stepping Stones

Youth Justice
Service- Delivery
of Standard Teen

Models of Triple P deployment (inc: pros / cons)

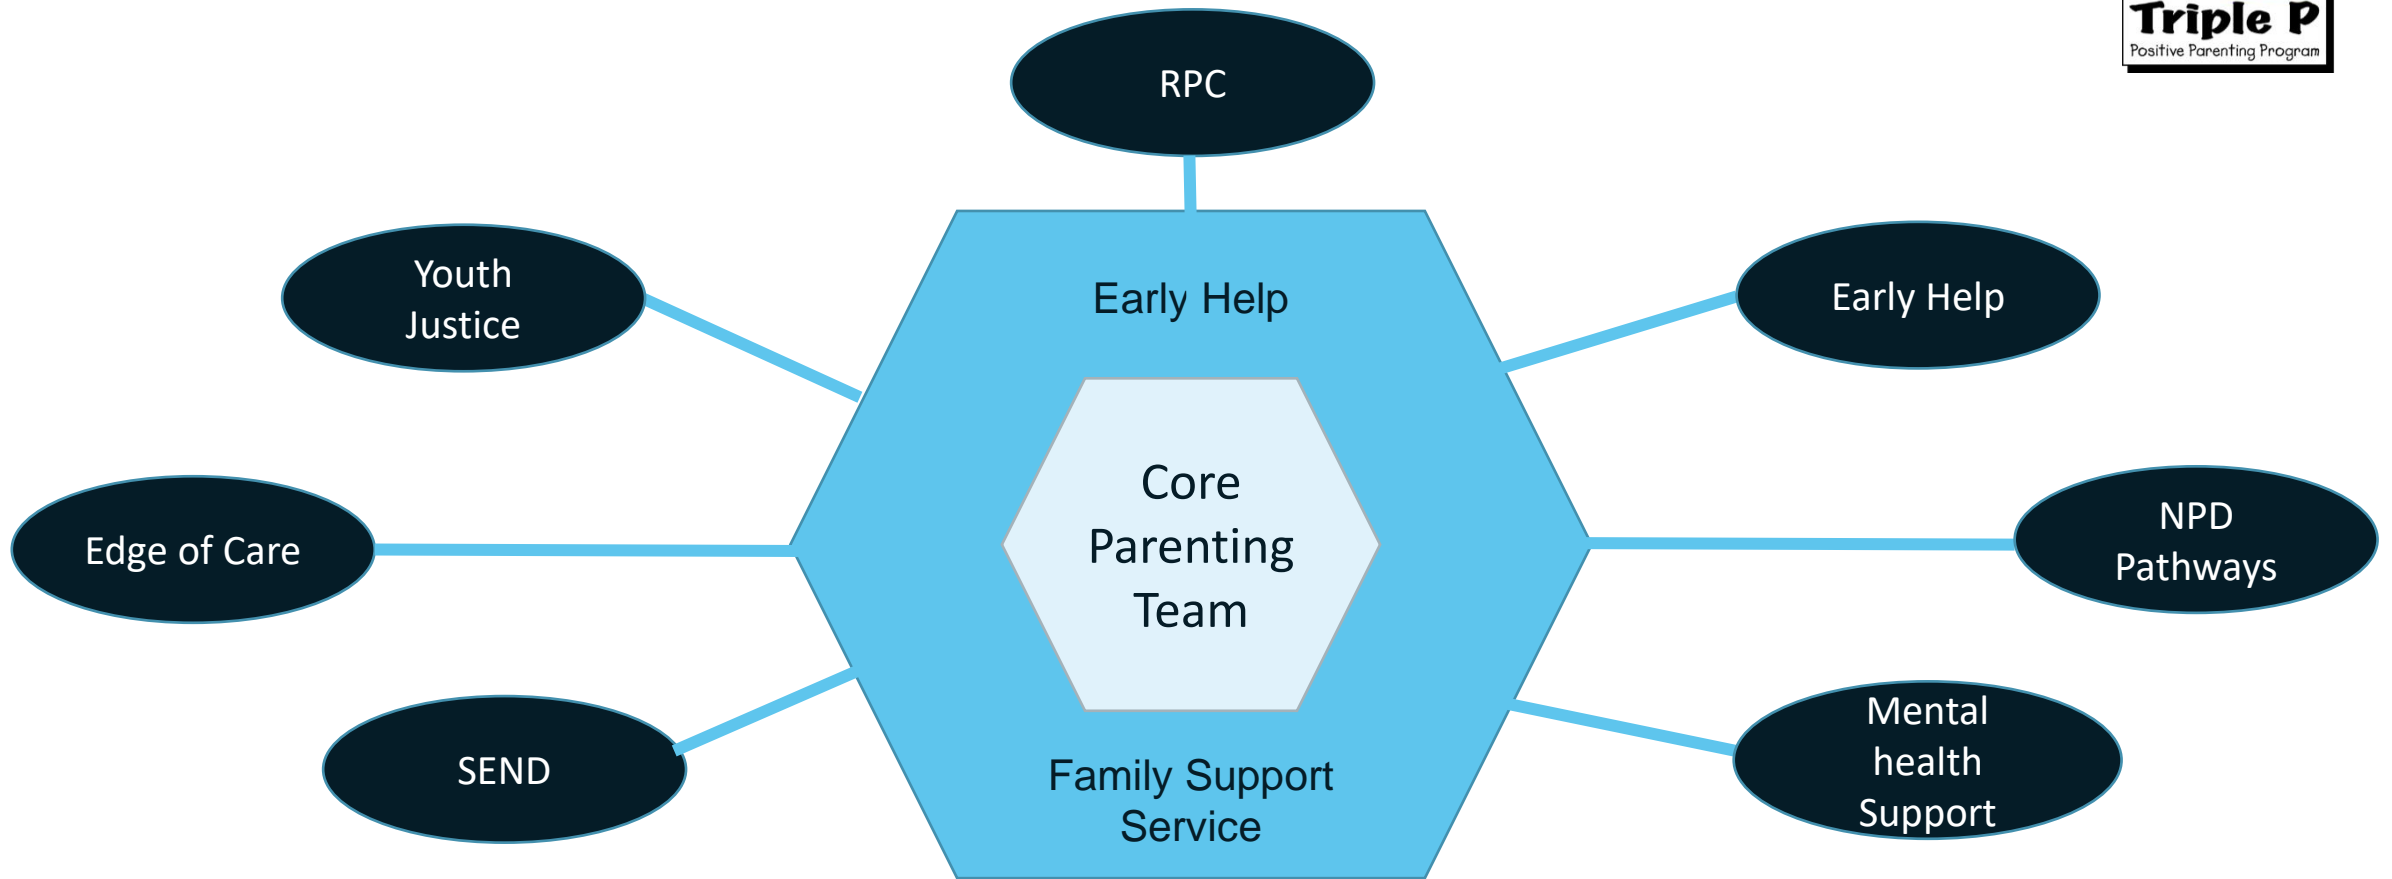

Multiple Services / Teams

Children Centre
Early Help
(Universal offer):
Level 3 Discussion
Groups & Level 4
Group

Supporting Families
Targeted Teen
Parenting Team:
Level 4 Group Teen
& Standard Teen

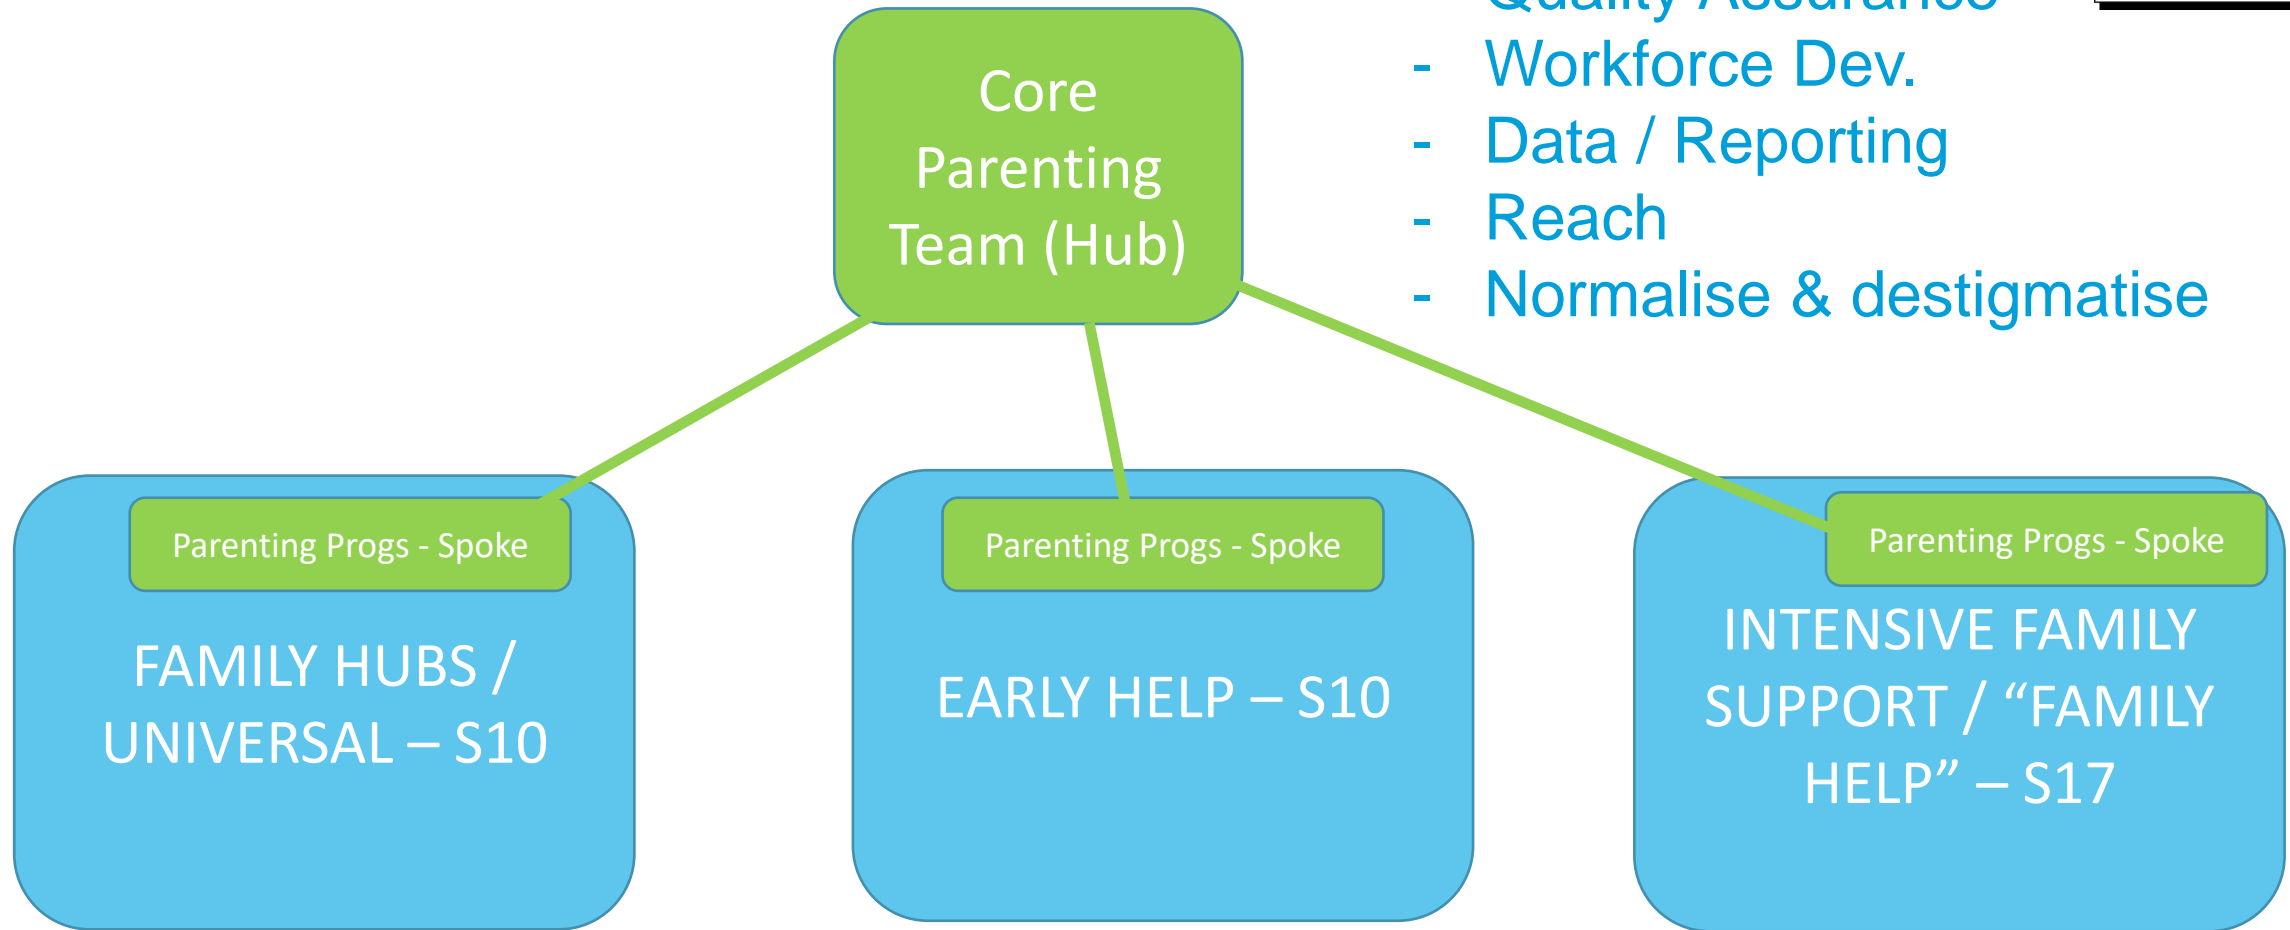

Youth Justice Service:
Delivery of Level 4
Standard Teen

Models of Triple P deployment (inc: pros / cons)

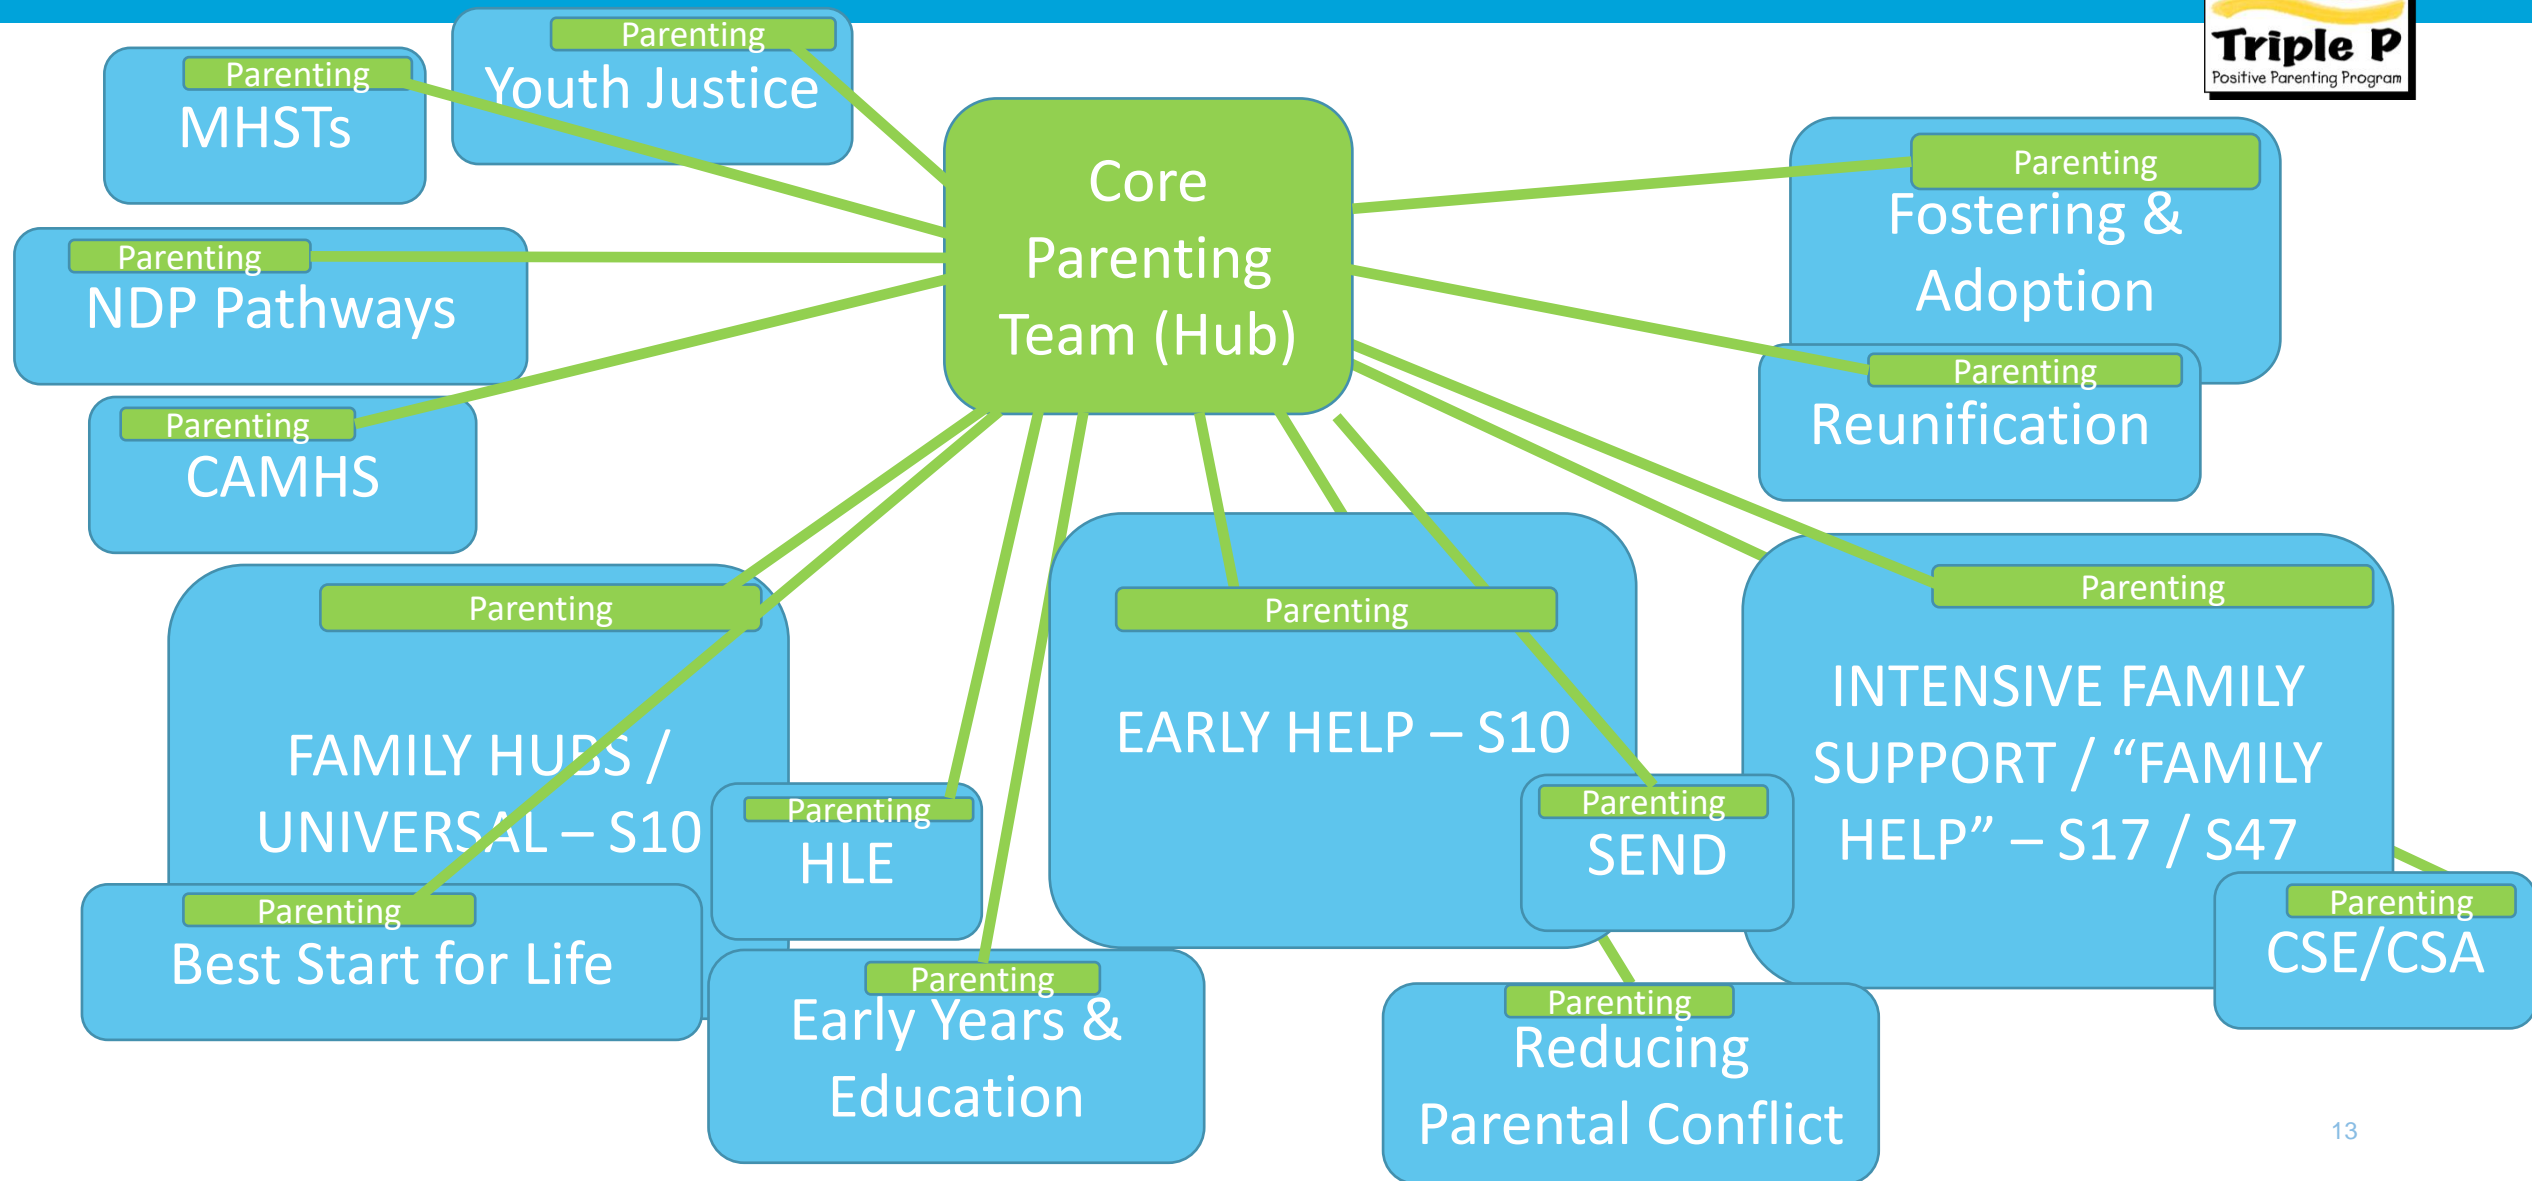

Core Team co-ordinating model (multiple levels of Triple P)

Models of Triple P deployment – Joining the Dots

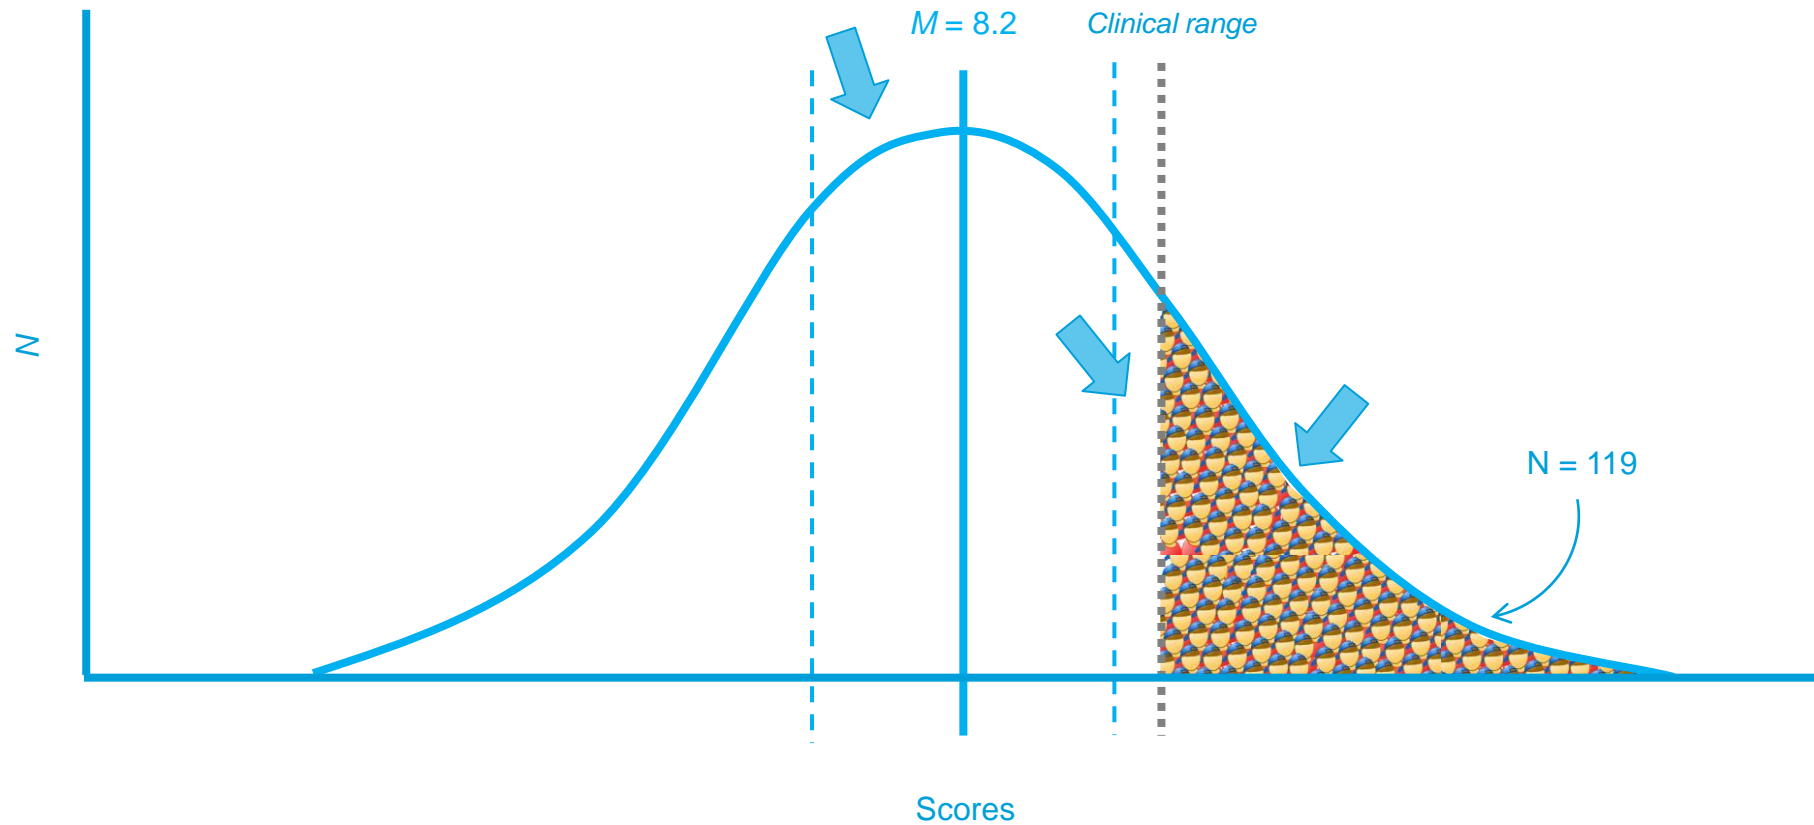

Joining the Dots

Why we need a public health approach

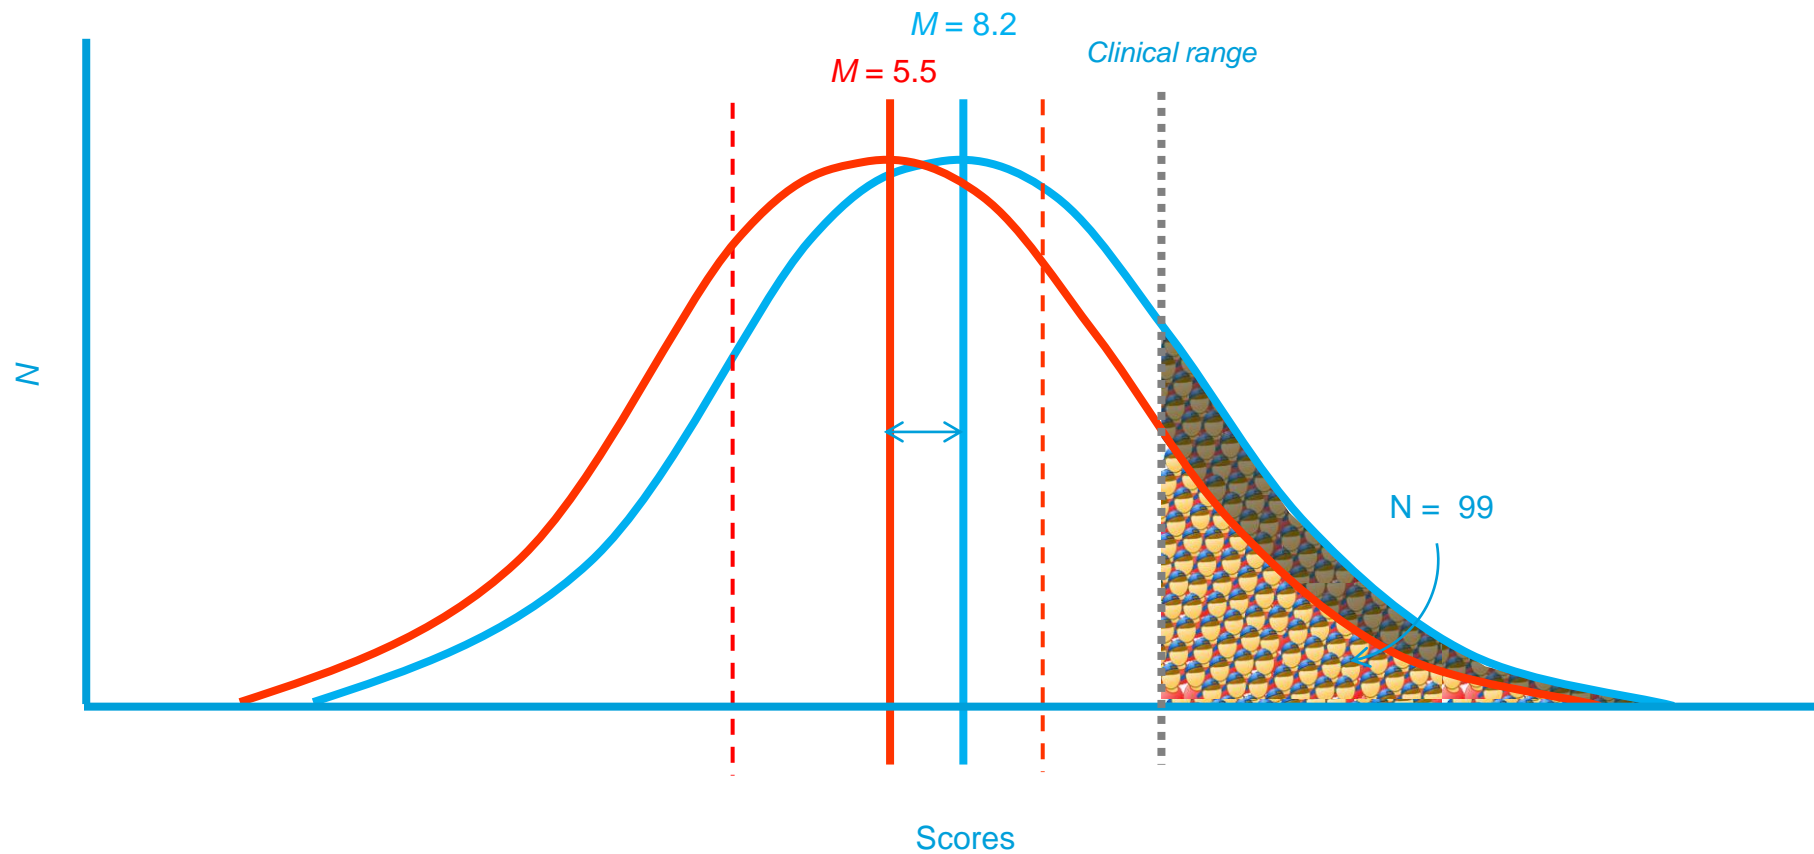

Children in the clinically elevated range on the SDQ (N=1,500)

Small changes in populations have big impacts on high levels of need

What if we could lower the population mean by 0.5SD
